# Definitions

**ATMOSPHERE**—All of the gases around Earth or another planet or moon

**CLIMATE**—The average weather of a place over many years

**ENVIRONMENT**—Everything that surrounds us on Earth, including all living things, the air, ocean, and land

**FOSSIL FUEL**—A fuel such as coal, oil, or gasoline that contains carbon and is made from the remains of ancient plants and animals

**GREENHOUSE GAS**—A gas that traps heat in the atmosphere

**RECYCLE**—To process something so it can be reused

**RENEWABLE ENERGY**—Energy that comes from natural sources, such as the wind or the sun, that don't run out

**SOLAR POWER**—Renewable energy that is made by turning sunlight into electricity

**WEATHER**—The state of the atmosphere (such as cold, hot, wet, or dry) in one place at one particular time

**WIND TURBINE**—A machine that turns the energy of the wind into electrical energy; sometimes called a windmill
